

INSJACK-F®

FIREPROOF REMOVABLE INSULATION COVERS

INSPRO
www.inspro.nl

Passive Fire Protection system is a high-performance solution designed to meet the most demanding requirements for protection of critical equipment from Hydrocarbon Pool Fire conditions. Up to 180 minutes protection, INSJACK-F® Systems can be applied on valves, actuators, instrument panels, process vessels, cable trays, tube & pipework and has been supplied extensively worldwide for both Onshore and Offshore Oil & Gas and Petrochemical Plants.

INSJACK-F® jet fire resistant jackets have been tested in an extensive range. It means INSJACK-F® may be used on a wide variety of fittings and equipment such as; piping, flanges, valves and actuators, vessels, heat exchangers, pipe supports and control panels.

INSJACK-F® is a range of tailor-made flexible insulation covers which is designed to provide high performance thermal insulation while providing protection from jet and / or hydrocarbon fire to equipment which requires frequent maintenance access.
